IDW/AD '16 should be of interest to not only researchers and engineers, but also managers of companies and institutions in the display community.

Special Topics of Interest on Oxide-Semiconductor TFT (OXT)

Currently, oxide semiconductor TFTs have been hugely successful in the industrial fields of flat panel displays. However, they are not yet a completed technology and we can find a lot of improvements day by day. In this IDW, not only the champion of the oxide semiconductor, IGZO, but also other finalists, including novel oxide materials, will be presented. New device structures and innovative deposition processes including solution processes will be also presented. By clarifying the operation mechanism, we can improve the performance stability. High resolution and large displays as well as challenging applications will be proposed. "Oxide semiconductors are the jewelry box in the information display world !" Don't miss it!

Special Topics of Interest on AR/VR and Hyper Reality (AR&VR)

In recent years, augmented reality (AR) and virtual reality (VR) applications have been making substantial progress with high-performance display

devices and sensors including cameras with tracking capabilities and computer graphics technologies.

There are several sessions for wearable devices such as head-mounted-displays. PRJ-WS introduces researches on hardware issues, LCT-WS on the quality of LCD, and VHF-WS on human perception side of wearable devices. We also introduce research about AR systems. PRJ-WS and DES-WS co-organize a session for introducing Spatial AR, which uses projector(s) for AR, while 3D-WS and 3DSA-WS introduce hyper realistic display systems and audio/haptic displays. A session organized by INP-WS introduces user interaction techniques used in AR systems.

JAPAN RAILWAY PASSES

Japan Railway (JR) provides the following economical passes. They are the most economical and flexible rail passes to travel from around Osaka to Hakata (Sanyo-San'in Area Pass) and Kyushu area by Bullet Train and rail. They should be purchased before you leave your country. Please contact your travel agency. Visit following sites for the details.

(1) Sanyo-San'in Area Pass (Shin-Osaka↔Hakata) :
http://www.westjr.co.jp/global/en/ticket/pass/sanyo_sanin/

(2) JR Kyusyu Pass (Northern Kyushu Area and All Kyushu Area) :

FUKUOKA

Fukuoka City (also known as “Hakata”) lies on the northern coast of Kyushu, the southernmost of the four main islands of Japan. The population of the city is approximately 1.5 million people, making it the 5th largest city in Japan.

Being the closest major city in Japan to the Korean Peninsula and China, Fukuoka has from ancient times been a gateway for economic and cultural exchanges with its Asian neighbors. On the basis of these historical and geographical links, the city is working on many levels to strengthen its relationships with the rest of Asia, towards the goal of becoming a “focal point for exchange in Asia”.

PLACES OF INTEREST

Dazaifu Tenmangu Shrine

Nishitetsu trains are available from Tenjin to Dazaifu Tenmangu (about 20 minutes by train and then 5 minutes on foot). Here, at the head shrine of all the Tenmangu Shrines in Japan, the god of learning, Michizane Sugawara, is worshipped. The plum tree to the right of the main building as you face it is called Tobiume (the flying plum tree), because it is said that the tree flew here to be with Michizane.

Kyushu National Museum

This museum is located a 5-minute walk from Dazaifu Tenmangu Shrine, and is Japan’s newest National Museum after Tokyo, Kyoto, and Nara. Based on the concept of “Understanding Japanese culture from an Asian viewpoint”, various valuable exhibits depict Japan’s blossoming relationships with other Asian countries over a long time.

Fukuoka City Museum

Covered with half-mirrored windows, this museum stands with the Fukuoka Tower rising behind it (about 15 minutes by bus from Hakata Station). There are 4 different exhibition rooms and a special exhibition room for visiting exhibitions. The Gold Seal, one of Japan’s national treasures, is exhibited in the Permanent Exhibition Room.

Uminonakamichi

Uminonakamichi is a peninsula connecting Shikanoshima Island in Higashi Ward to mainland Fukuoka. A large peninsula measuring about 8 km in length and about 2.5 km in width at its widest point, Uminonakamichi is a recreation area with a park in its central to north-western region. The JR Kashii Line and prefectural roads run parallel through Uminonakamichi, providing a popular scenic route. Those who prefer a boat ride can catch a ferry operated by Fukuoka City at the Bayside Place Hakata Futoh.

Nakasu-Tenjin Area

“Hakata” is famous for “Hakata Ramen”. One of the special features of nighttime Hakata is “Yatai (Street Stalls)”, street stalls that appear on the streets in the evening in Nakasu, Tenjin, and other areas. Yatai offer a range of hot tasty foods including Hakata Ramen, and a chance to rub shoulders with the locals.
