

Text Instructions for a Camera-Ready Manuscript of the Late-News Papers for IDW '17

Hideya Kumomi, Toshimitsu Tsuzuki*, Ken Ishikawa, Harumi Kawamura **

Tokyo Inst. of Tech., 4259 Nagatsuta-cho, Yokohama, Kanagawa 226-8503, Japan

* NHK, 1-10-11 Kinuta, Setagaya-ku, Tokyo 157-8510, Japan** Salesian Polytechnic, 4-6-8 Oyamagaoka, Machida, Tokyo, 194-0215, Japan

Keywords: Keyword 1, Keyword 2, Keyword 3, Keyword 4, Keyword 5 (One line, three to five keywords)

ABSTRACT

An abstract is required at the beginning of the manuscript. You must also make an additional data file for 35-50 words abstract published in the Final Program, which will be opened in the middle of November. Please use the template for 35-50 words abstract. The camera-ready manuscript and the 35-50 words abstract must be submitted by September 29, at 23:59 (UTC-10).

1. INTRODUCTION

In this article, we describe the instructions for a camera-ready manuscript for the proceedings of IDW '17 and its electronic data. The article must be typed in accordance with the instructions. We recommend you use this form as a template of your manuscript. To ensure proper reproduction, authors must follow the instructions below.

2. TEXT

2.1 Title

The title of the paper must be the same as what you submitted via IDW web site.

2.2 Authors

Please write in the authors' names in full. Also, the presenting author must be underlined.

2.3 Format

1. The manuscript must be on A4 size paper, in a two-column format.
2. The top, left, right, and bottom margins must be 25 mm, 20 mm, 20 mm and 35 mm, respectively. Allow 10 mm for the column spacing.
3. For good readability, the font size of your manuscript must be 9 point or larger. Times New Roman, Helvetica and Arial fonts are recommended. Symbol, Wingdings or Zapf Dingbats fonts

($\alpha\beta\gamma\delta\epsilon\zeta\eta\kappa\lambda\mu\nu\xi\omicron\pi\rho\sigma\tau\upsilon\phi\chi\omega\psi\theta\delta\Sigma\Delta$)

are strongly recommended for typing any math functions or Greek symbols. These special symbols can be inserted by using the insertion function for symbols and special characters in the MS-Word menu.

2.4 Length

A camera-ready manuscript must be two to four pages in length.

2.5 Headings and Subheadings

Major headings and subheadings must be aligned to the left side of the column.

2.5.1 Third-order subheadings

Third-order subheadings must be indented.

2.6 Electronic Data

1. Electronic data for your manuscript is required. Prepare the electronic file of your (camera-ready) manuscript in PDF format. The committee requests all authors to check the layout of the PDF file, because the layout sometimes differs from that in the original MS-Word file.
2. Please embed all fonts and confirm the quality of your PDF file by printout. The committee recommends setting the Adobe Acrobat option to "high quality" or "press quality".
3. Paper and page numbers will be added electronically to your electronic data by the committee. Please don't write paper and page numbers in any part of your manuscript including the header and footer parts.
4. Please don't set any security option on your PDF.

3. PHOTOS AND FIGURES

3.1 Color Photos and Figures

Color images will be kept in the proceedings electronic data as shown in Fig. 1.

3.2 Fonts in Photos and Figures

When you type text in photos or figures, Times New Roman, Helvetica, Arial, and Symbol fonts are strongly recommended.

3.3 Numbering and Captions

All photos and figures must be captioned with a figure number (and/or photo number), title and description. Use the insert text box command to place the caption below the figures or photos, and then group the art with the caption. For good readability, the font size in your figures must be 9 point or larger (See Fig.1).

3.4 Gray Backgrounds

Avoid gray backgrounds; gray-scaling may impair the appearance when printed on a black-and-white printer.

3.5 Hairlines

Do not choose "hairline" (the thinnest line thickness) as the weight of lines used in your figures; the printed thickness of the "hairline" setting depends on the

resolution of the printer used.

4. SUBMISSION

4.1 On-line Submission

Prepare the electronic files of your (camera-ready) manuscript file in PDF format and abstract file in MS-Word format and submit them via the IDW '17 web site (<http://www.idw.or.jp/latenews.html>) by September 29, at 23:59 (UTC-10).

4.2 Difficulty in On-line Submission

If you have any difficulty in the on-line submission, please contact the IDW '17 secretariat (idw-prog@idw.or.jp).

REFERENCES

- [1] Complete bibliographic information (names of "all" authors, "fully descriptive article titles") for all cited references is required. See the examples below.
- [2] S. Iijima, "Toward Industrial Application of Carbon Nanotube," Proc. IDW '03, pp. 3-4 (2003).
